Custom-built automotive icons

The motor bodies we use are made by a licensed manufacturer who is authorised to use the original Ford and GM blueprints. All Trade Marks are the Respective Property of Ford and General Motors and are only used to indicate the licence provided. to dynacorn classic bodies inc. Alternatively we can start from an original vehicle.

STARS OF THE 60S

In every period of the motor age, there have been great-looking cars. However the decade beginning in 1960 was particularly blessed with automotive icons.

It was a time when manufacturers were free to design cars without constraints. They were inspired by the Space Race, the youthful counterculture and a surge of libertarian values.

Designers discarded tail fins, but they kept horizontal lines. They began to play with the concept of aerodynamic streamlining. And they recognised that the sex appeal of rebellion could be translated into an automotive body shape.

RE-ENGINEERED FOR TODAY

Now, with the approval of Ford and GM, the most charismatic cars of the 60s are being born again.

International Performance Classics of Auckland are using their engineering and coach-building skills to build movie star cars from the ground up. We begin with a brand new body - made under license in the USA from Ford and GM's original blueprints - then we add the performance and reliability benefits of modern drive train and running gear.

You get the best of two eras – the spirit of the 60s combined with the reliability, handling and power that you'd expect from a modern luxury car.

MODERN ADVANCEMENTS TO COMPLEMENT A CLASSIC BODY

- Coilover suspension
- Sequential fuel injection
- Oversized brakes
- Tremec TKO manual or automatic transmission
- Posi-traction
- Serpentine drive belt system
- Braided stainless fuel lines
- Air conditioning
- Custom sound system
- Additional owner-specified upgrades can include leather interior, keyless entry, custom in-dash DVD and satellite navigation.

ABOUT INTERNATIONAL PERFORMANCE CLASSICS

International Performance Classics is a division of International Motorsport Ltd, a professional motorsport and car-building company with more than 40 years experience supporting one of the world's largest and most successful professional race teams.

The engineering and coach-building skills that exist within International Motorsport are deployed to custom-build high performance classic cars. International Motorsport has prepared race cars for numerous world-class drivers and local heroes. Now it's your turn.
